

## **vtVAX Release Notes**

**Version 1.1.0.19**

### **Released**

7-Mar-2012

### **Components**

|               |          |
|---------------|----------|
| vtVAX Manager | 1.1.0.19 |
| vtVAXMVII     | 1.0.0.6  |
| vtVAX3900     | 1.1.0.16 |
| vtVAX4100     | 1.0.0.17 |

### **Enhancements**

#### **vtVAX Common**

- 1) Permanent licenses now display as “unlimited” instead of counting down from 9998 days (27 1/3 years).

### **Bug Fixes**

#### **vtVAX Manager 1.1.0.19**

- 1) Corrected license status reporting in status bar.
- 2) Recognizes 3600 in configuration.

#### **vtVAX4100 1.0.0.16**

- 1) Fixed shadowing issue caused by old data being held in SCSI FIFO.

**vtVAXMVII 1.0.0.5, vtVAX3900 1.1.0.15, vtVAX4100 1.0.0.15**

- 1) Fixed TQK50 error that was halting emulator on re-attachment of a virtual container and creating a new thread on each reattachment.
- 2) Fixed RQDX3 error that was creating a new thread on each container reattachment.

**vtVAX4100**

- 1) Removed TX descriptor spanning message from 4100/4200 SGEC.

**vtVAX Common**

- 1) Empty CDRom on RQ, causes detach, causes access violation.
- 2) Empty CDRom on SCSI causes access violation.
- 3) CDRom on SCSI will cause VMS to machine check.
- 4) DSSI is not enabled in this release.
- 5) TZ89 indicates variable length blocks not supported.

## Restrictions

**vtVAX Manager**

- 1) 4100 DSSI is not enabled in this release.
- 2) 4200 not enabled in this release.
